

As an amateur radio operator since 1964, I sincerely wish to persuade the FCC from allowing BPL to be implemented. As I'm sure you are aware, every test of BPL so far has shown that it causes significant HF radio interference. The severe deterioration of the shortwave bands will destroy many people's life hobby. Amateur radio will be reduced to users with high-power amplifiers and large antennas. It will also hinder emergency and military HF communication, thereby reducing national security. There are many other and better technologies that make BPL unnecessary.
